TRACT OR PARCEL MAP NO:		
NAME OF PROJECT:		

The undersigned hereby applies for Construction Meter Service commencing on \_\_\_\_\_, 1<sup>st</sup> <sup>20</sup>\_\_\_\_, such service to be furnished at three times the regular rate and may be discontinued on 24-hour written notice by either applicant or Palmdale Water District. Applicant hereby agrees that Palmdale Water District will not be responsible for damage to persons, equipment, or property caused by defects of applicant's piping, which will be hereafter connected to the discharge side of the meter, or by the occurrence of either high or low pressure or escape of water by leakage from said downstream piping while the meter is in service.

The applicant agrees that the maximum rate of flow to be used on this project will not exceed 250 gallons per minute or the lower rate of flow shown in the blank space immediately adjacent hereto (\_\_\_\_\_).

Applicant further agrees to use this construction meter only during normal Palmdale Water District working hours which are 8:00 a.m. to 5:00 p.m. and excludes weekends and holidays.

Applicant understands that the meter under this application is to be used only at the above location, determined by Palmdale Water District, and for the job indicated under this application entirely within the Palmdale Water District's boundaries.

Applicant hereby certifies that he fully understands that the construction meter to be issued under this application is to be used for underground utility construction, dust control, finish grade earthwork, and other uses as approved by Palmdale Water District. The meter is only to be used in conjunction with a tilt-up tank or stand pipe providing air gap backflow protection unless otherwise authorized in writing by Palmdale Water District.

Any violation of these conditions and/or any act deemed to be construed as unauthorized use of water shall be subject to a \$1,000.00 fine imposed per incidence.

Applicant agrees to return the construction meter to Palmdale Water District at the end of use in good repair and operating condition and understands that in the event that he does not return the meter or the meter is inoperable, the District will use that part of the applicable deposit required to either replace or repair the meter as the case may be and then refund any remaining portion of said deposit.
